

ICT Innovation for Manufacturing SMEs (I4MS) is a program promoted by the European Commission to expand the digital innovation of manufacturing SMEs in Europe

### About the I4MS Disruptors Awards

Each year, the I4MS Coordination and Support Action project will launch the Disruptor Award in order to select the best cases or experiments illustrating a company's ability to innovate and implement ICT technologies which improve manufacturing processes or increase productivity.

### Who can participate?

The I4MS Disruptor Award welcomes applications from SMEs and Midcaps that have previously received financial and technological support by the Innovation Actions part of the I4MS initiative.

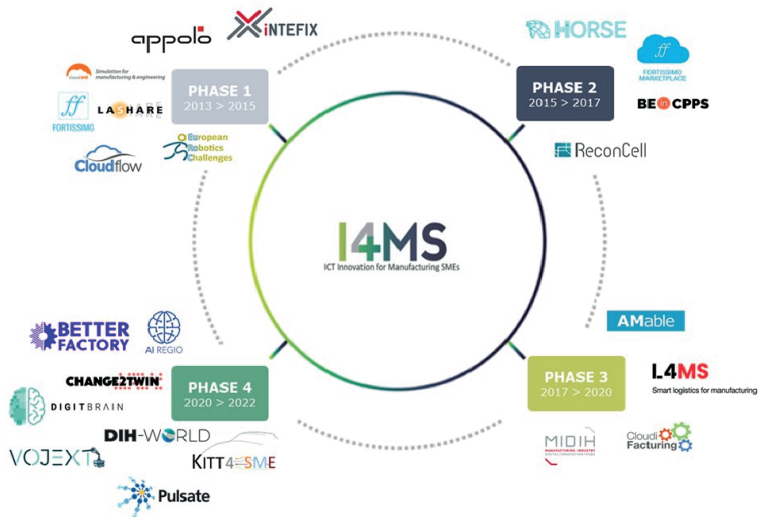

Up to three finalists will be selected and receive the package award, but there can be **only one winner**.

### How can I participate?

From Monday 24th of May until Monday 20th of September 2021 share your application experiment success result through the following link.

<https://i4ms-disruptor-award-third-open-call.fundingbox.com/>

### What can I receive

- Widespread visibility on the I4MS website and community platform.
- Networking opportunities.
- Media Exposure.
- Attendance to World Class Events and awarding ceremony.
- Access to training and workshops.
